

## Bridge Compatibility Requirements

The **2.21.1.136** version of Bridge requires the following minimum software versions

- eTakeoff Dimension version 6.1-13 or above
  - Autodesk Navisworks Manage or Simulate (2017/2018/2019/2020)
  - eTakeoff Navisworks Integrator version 2.20.7.104
  - Assemble Systems Desktop – 4.21.1
  - Sage Essential Estimating
    - Version 20.1.2006.251
  - Sage SQL Estimating
    - Version 18.11.1807.251
    - Version 18.12.1810.182
    - Version 19.11.1907.201
    - Version 19.12.1911.141
    - Version 20.1.2006.251
  - Minimum O/S Requirement
    - Compatible with Sage O/S requirements
- Bridge 2.21 also requires .NET Framework 4.6.2

The Sage SQL installation includes .NET 4.6.2 as part of the installation process. Also .NET 4.6.2 is included in the Windows 10 Anniversary Update Edition and Windows Server 2016 and can be installed on other OS versions (Windows 8.1 & Windows 7 SP1). The .NET 4.6.2 installer can be downloaded [HERE](#)

If you have any questions about your environment, check with your IT professional.

- **REMINDER: If performing any updates/changes to Sage Estimating, be certain to uninstall and reinstall Bridge AFTER the Sage update.** You can also reinstall Bridge over the existing copy of Bridge using the CHANGE option. If the Navisworks Integrator is already installed, that installation will be unaffected.
- 
- If you are using Sage Pervasive Estimating, have created Mapping Histories in Bridge AND will be migrating your Pervasive Databases to SQL, there is a document outlining how you can copy your Pervasive Bridge Mapping History to create new matching mappings for your migrated Sage SQL database. Please click [HERE](#) for detailed instructions.
