# Bridge and Navisworks Integrator Major Release

July 2025

**IMPORTANT CHANGES - PLEASE READ THIS ENTIRE DOCUMENT BEFORE INSTALLING THIS VERSION OF BRIDGE!**

---

## eTakeoff Navisworks Integrator Ver 2.24.9.132 Available

- Navisworks 2025 compatibility.
- Compatible with Navisworks Manage and Simulate 2022-2025
- Support for Navisworks 2017-2021 dropped - no longer supported by Autodesk
- Navisworks Simulate Installer fixed
- **Install Navisworks Integrator AFTER installing/updating Bridge**

Navisworks Integrator Ver 2.24.9.132 may be downloaded [HERE](#)

---

## Bridge Ver 4.25.7.146 Available

Please review these release notes in their entirety before installing this new version of Bridge. Please refer to the [Online Training Guide](#) for additional information pertaining to these changes.

**Note:** Do not install this version of Bridge unless you are running a Sage Estimating version listed under [Compatibility](#).

**Note:** If you are upgrading Bridge from a version earlier than 2.16.12.4, you will need to perform a Bridge Database Conversion. Please read the [Bridge Database Conversion](#) document for complete instructions BEFORE performing this Bridge Upgrade.

**Note:** If performing any updates/changes to Sage Estimating, such as upgrading to the new Sage 24.1 release, always RUN Sage after the upgrade to finish the database conversions and full verification. Then uninstall/reinstall Bridge AFTER the Sage update. If the Navisworks Integrator is already installed, that installation will be unaffected.

## Compatibility

The **4.25.7.146** version of Bridge requires the following **minimum** software versions:

- eTakeoff Dimension version 8.2-8
- Autodesk Navisworks Manage or Simulate (2022-2025)
- eTakeoff Navisworks Integrator version 2.24.9.132
- Assemble Systems Desktop - 4.21.1
- Sage SQL Estimating
  - Version 22.1.2209.191
  - Version 23.1.2311.151
  - Version 24.1.2407.031
  - Version 25.1.2507.011
- Minimum O/S Requirement
  - Compatible with Sage O/S requirements
- Bridge 4.25 also requires .NET Framework 4.8
  - The Sage SQL installation includes .NET 4.8 as part of the installation process.
  - .NET 4.8 is included in current Windows 10/11 environments.
  - If you have any questions about your environment, check with your IT professional.

## Bridge Changes & Enhancements

- Includes compatibility with Sage Estimating 25.1
- Includes compatibility with Sage Spreadsheet Takeoff
- Sage 20 & 21 support dropped – versions no longer supported by Sage
- Includes compatibility with Navisworks Integrator 2025
- Includes modifications to support Sage Spreadsheet Takeoff
  - Reset Assignment Counts - Clear and Refresh options will also work with Spreadsheet Takeoff transactions.
  - Licensing infrastructure
  - Internal modifications to enable Bridge and Sage Spreadsheet takeoff to co-exist
- Bug Fix - 403 error - Azure incompatibility fixed
- Other misc bug fixes

Bridge Ver 4.25.7.146 may be downloaded [HERE](#)
