

Bridge & Dimension Release

July 2026 – Sage 26 Compatibility

eTakeoff Dimension Ver 8.2-15 Available

This Dimension version is required for Bridge 4.26.7.152 compatibility. **Download and install Dimension AND Sage 26 BEFORE installing Bridge.**

Dimension Changes & Enhancements

- Added Look preference for Show Quantity Worksheet
- Added Search/Filter functionality to Traces control panel
- Added “Add New Measurement using this Trace” measurement context menu option
- Added “Show in Measurement List” measurement context menu option
- Added “Select all measurements using this Trace” measurement context menu option
- Added “Do this for all items” checkbox when performing a Change Trace on multiple measurements
- Several measurement context menu items renamed for clarity and consistency
- Enhanced error handling and reporting for licensing checks and unlock screen
- Misc. help system updates
- Misc Fixes
 - Fix for Drawing Compare and Pattern Search to better handle PDF files with unsupported elements
 - Fix for Clipboard Copy and TIFF conversions to better handle PDF files with unsupported elements
 - Make Drawing Print dialog options “Use Safe Print” and “Bypass Printer Driver” mutually exclusive
 - Fixes for 1 point line and 2 point rect working incorrectly
 - Fix incorrect rubber banding (drawing) during 2 point line operations
 - Fix 2 point rect toolbar option for disconnected points
 - Fix issues with licensing re-check button functionality
 - Add “Use Safe Print” checkbox option to Drawing Print dialog to better handle PDF files with unsupported elements

Bridge Ver 4.26.7.152 Available

Please review these release notes in their entirety before installing this new version of Bridge. Please refer to the [Online Training Guide](#) for additional information pertaining to these changes.

Note: Do not install this version of Bridge unless you are running a Sage Estimating version listed under [Compatibility](#).

Note: If you are upgrading Bridge from a version earlier than 2.16.12.4, you will need to perform a Bridge Database Conversion. Please read the [Bridge Database Conversion](#) document for complete instructions BEFORE performing this Bridge Upgrade.

Note: If performing any updates/changes to Sage Estimating, such as upgrading to the new Sage 25.2 release, always RUN Sage after the Sage upgrade to finish the database conversions and full verification. Then uninstall/reinstall Bridge AFTER the Sage update. If the Navisworks Integrator is already installed, that installation will be unaffected.

Compatibility

The **4.26.7.152** version of Bridge requires the following **minimum** software versions:

- eTakeoff Dimension version 8.2-15
- Autodesk Navisworks Manage or Simulate (2022-2025)
- eTakeoff Navisworks Integrator version 2.24.9.132
- Assemble Systems Desktop - 4.21.1
- Sage SQL Estimating
 - Version 24.1.2407.031
 - Version 25.1.2507.011
 - Version 25.2.2510.091
 - Version 26.1.2607.151.
- Minimum O/S Requirement
 - Compatible with Sage O/S requirements
- Bridge 4.25 also requires .NET Framework 4.8
 - The Sage SQL installation includes .NET 4.8 as part of the installation process.
 - .NET 4.8 is included in current Windows 10/11 environments.
 - If you have any questions about your environment, check with your IT professional.

Bridge Changes & Enhancements

- Sage Est 22 & 23 compatibility dropped – Sage no longer supports these versions
- One Time Item – when dropping a measurement at PHASE level, use the Measurement Description instead of the trace name.
- Misc Fixes
 - Dimension Trace Utility unable to start with Sage 25.2
 - Secondary Measurement mapping was dropped if not used in most recent pass
 - Don't allow mapping One Time Items if not added to Sage Database
 - Dimension Trace Utility – Detect/Flag duplicates in import file

Bridge Ver 4.26.7.152 may be downloaded [HERE](#)
