

Bridge Compatibility Requirements

The 2.21.6.384 version of Bridge requires the following minimum software versions

- eTakeoff Dimension version 7.0-10
 - Autodesk Navisworks Manage or Simulate (2017/2018/2019/2020/2022)
 - eTakeoff Navisworks Integrator version 2.21.6.126
 - Assemble Systems Desktop – 4.21.1
 - Sage Essential Estimating
 - Version 20.1.2006.251
 - Version 21.1.2006.283 (64 bit)
 - Sage SQL Estimating
 - Version 19.11.1907.201
 - Version 19.12.1911.141
 - Version 20.1.2006.251
 - Version 21.1.2106.283 (64 bit)
 - Minimum O/S Requirement
 - Compatible with Sage O/S requirements
- Bridge 2.21 also requires .NET Framework 4.8

The Sage SQL Estimating 21.1 installation (64 bit) includes .NET 4.8 as part of the installation process. Also, if your Windows 10 O/S is current, then .NET 4.8 should already be resident.

If needed, the .NET 4.8 installer can be downloaded [HERE](#)

If you have any questions about your environment, check with your IT professional.

- **REMINDER: If performing any updates/changes to Sage Estimating, be certain to uninstall and reinstall Bridge AFTER the Sage update.** If the Navisworks Integrator is already installed, that installation will be unaffected.
-
- If you are using Sage Pervasive Estimating, have created Mapping Histories in Bridge AND will be migrating your Pervasive Databases to SQL, there is a document outlining how you can copy your Pervasive Bridge Mapping History to create new matching mappings for your migrated Sage SQL database. Please click [HERE](#) for detailed instructions.
